PROJECTS

My Portfolio:

- Designed and developed a responsive personal portfolio website to showcase projects, skills, and professional background.
- Implemented navigation, interactive UI elements, and mobile-friendly design to enhance user experience.
- Technologies used in it - HTML, CSS, and JavaScript

Pattern Pulse:

- This is a simple game where the goal is for the user to repeat the pattern shown by the program. With each round, a new step is added to the pattern, making it more difficult.
- Technologies used in it - HTML, CSS, and JavaScript

Zerodha Clone:

- Developed a frontend-only clone of Zerodha's stock trading platform interface using React.js to demonstrate designing skills and component-based architecture.
- The project focuses on replicating the clean, professional layout and responsive design of the original Zerodha app.
- Emphasized modern frontend practices including **state management, routing, and responsive design principles** to mirror the real user experience.

Academic Excellence

- Secured third position in District during 3rd semester of Graduation.
- Achieved 2nd Position during graduation with **81.21%**.
- Solved 30+ problems on leetcode- Based on arrays.
